Jackie Von Tobel : Design Directory of Window Treatments, The before purchasing it in order to gauge whether or not it would be worth my time, and all praised Design Directory of Window Treatments, The:

0 of 0 people found the following review helpful. Five Stars By Dawn B Walker The "MUST HAVE" for anyone who is in the business 3 of 3 people found the following review helpful. If color drawings of window designs is what you are looking for By Renartman Book is a compilation of window treatment drawings. This book might be of great value to interior decorators as a source of reference material for their clients to decide their window treatment. For the sewer, who is looking for instruction or patterns for making these curtain designs--this is not the book. It is a design directory only; there are many drawings and some reference to contacting a pattern company but there are no directions or patterns included in this book. 0 of 0 people found the following review helpful. Excellent book By S. Piersol I have several other books on drapes and thought do I need another... well I did. Really great book also has disc so can send

items to clients. My associate teaches a Design class and is now going to make her students buy this book rather than the one she used to recommend. This is a big and heavy book so being able to print pages you need really helps rather than having to take this to client meetings..

The Design Directory of Window Treatments features professional illustrations detailing every type of window treatment imaginable, and is an invaluable guide for trade professionals and consumers. Jackie Von Tobel performed an exhaustive search of current window treatment design and manufacturing trends to identify and name more than 350 individual components that can be mixed and matched to create an infinite number of window treatments. Each of these elements and designs are expertly illustrated in more than 1300 color renderings that can be used repeatedly. Black-and-white line drawings of these illustrations are also included on a companion CD-Rom, along with a complete worksheet system for designer use.

From the Back Cover THE DESIGN DIRECTORY OF WINDOW TREATMENTS is a professionally illustrated volume detailing the most complete collection of standard and unique window treatment components and designs ever assembled. A must-have resource for designers, workroom professionals and do-it-yourselfers, this directory has concise, straight-to-the-point lists, definitions and descriptions of design fundamentals and components to provide a complete education on window treatments. From drapery, headings and top treatments to shades, awnings and embellishments, each section will assist you in making decisions critical to your design success. The most comprehensive collection of current styles and components ever assembled Over 1,300 inspirational full-color illustrations of current window treatments in a variety of styles to fit every budget More than 350 individual mix-and-match components that can be used to create an infinite number of stylish designs Cutting-edge style, from very advanced to super-easy no-sew designs Glossary of standardized terms for components and designs sanctioned by the Window Coverings Association of America Companion CD ROM of black line illustrations and industry worksheets for creating your own designs About the Author Jackie Von Tobel is a practicing interior designer with twenty years of experience in high-end residential design. She attended the University of San Diego and the Design Institute of San Diego. She is a member of the WCAA and is certified by the WFCP. Her interior design firm, Plush Home, is located in Las Vegas, Nevada. Excerpt. Reprinted by permission. All rights reserved. How to Use This Book CREATING A BEAUTIFUL WINDOW treatment that meets the specifications of your project is all about making the right choices. Too many times the wrong decisions are made due to lack of knowledge or exposure to the many options that are available to you. This directory breaks down thousands of current window treatment designs into over 350 individual components that can be used alone or in combination with each other to create unique designs that will expand your options and allow you to express your creativity. Each section of the directory will assist you in making decisions critical to your design success. Design: Using the fundamentals and calculations outlined in the first chapter, measure your window, analyze your space, and calculate the basic proportions, lay out, and construction of your design. Fabric: Choose the fiber, weave, pattern, hand, and color of the fabrics you will use. Heading: Plot your heading style and variations if you are designing panels, a valance, or a shade. Style: Choose one of the finished treatments in the book or use a combination of the individual components shown to create a new look. Patterns are available for many of the designs. Look for the pattern maker listed below the design description. Find their contact information in the resource directory. Embellishments: Apply the finishing touches that will personalize your design. Hardware: Choose the appropriate type and style of hardware or mounting technique for your treatment. Workroom: Communicate your designs effectively and accurately to your workroom to ensure that your treatments are made properly.
