I received the book in Wednesday's 10:00am mail delivery. The book was in great condition, it didn't have marks, tears, or rips. Thanks merchant for quality and quick service.

Originally titled Rsums in Cyberspace, this brand-new edition has been completely updated to keep pace with latest trends and developments in job hunting and career development opportunities via the Web. It gives job seekers advice and step-by-step instruction on how to create the perfect electronic rsum, which can be sent virtually anywhere in the world from ones home computer. The books list of web sites accepting e-rsums and offering jobs online has been

updated and streamlined, and now consists of the top ten companies in each major career category. Thousands of other links are kept up-to-date on the books companion web site. No longer perceived as a link book, this new edition places increased emphasis on the how-to of rsum design, writing, and use on the Internet. A new chapter teaches readers how to create and use e-portfolios in their job searches, which is then tied into the current chapter on home-page rsums. Here in a single volume is a virtual encyclopedia of everything job seekers need to know and understand in today's competitive job market.

From the Back Cover[back cover] This is an excellent nuts-and-bolts book. It covers everything a job seeker needs to know about electronic rsums. Linda Matias President, National Rsum Writers Association Originally titled Rsums in Cyberspace, this new edition describes the latest trends in job hunting and career development opportunities via the Web. You'll discover how to create the perfect electronic rsum, and then send it virtually anywhere in the world from your home computer. Just as important, you'll find an up-to-date and streamlined list of web sites that accept e-rsums and offer jobs online. But e-Rsums is much more than a link book. It gives you the how-to of rsum design and writing, then teaches you how to take full advantage of the Internet. One brand-new chapter will also teach you how to create and use an e-portfolio in your job search. Another will provide you with everything you need to know about how to use the Internet as a networking tool.
