**Charles Phillips : Encyclopedia of Wars - 3 Volume Set (Facts on File Library of World History)** before purchasing it in order to gauge whether or not it would be worth my time, and all praised Encyclopedia of Wars - 3 Volume Set (Facts on File Library of World History):

1 of 1 people found the following review helpful. Who cares about the date? By Kyle H Book is awesome! Who cares about the "date" thing. I like pepsi coca-cola... Chevy Ford... Star Trek and Star Wars... And war is totally interesting to read about. A must buy for anyone that likes history. 11 of 53 people found the following review helpful. Get over yourself By Dean RI can't comment on the book but would like to comment on the BC/AD thing. That system wasn't put in place till 1500 years after Jesus was supposed to be born and they probably got it wrong anyway, the best guess is he was born in 3BC. Get over yourself and buy the book. 50 of 254 people found the following review helpful. No

B.C.E. or C.E. 'history' books for meBy VeritasAmoNo matter how well researched this encyclopaedia of war is, I will not buy anything that uses the silly BCE/CE time frame reference instead of the traditional BC/AD. The idea that the politically correct BCE/Ce somehow is more acceptable than the time honored BC/AD is ridiculous since it is based up the exact same reference point: just say it...gasp...the birth of Jesus in Nazareth. I know that makes most ivory tower academic heads spin and eyeballs bulge out, but I find their dissing of the importance of this event intellectually dishonest and cowardly. How can they profess to be experts on any subject of history when they deny the very history they are heirs to. How can I expect truthful analysis of any historical subject from such people? I'd be curious to see if they treat the war histories accurately, or if they reflect the anti-western bias of most so-called academics and college professors. Too bad...this really would have made a great Christmas gift for my two sons who love military history and who aren't ashamed to use BC/AD in their papers.

Describes the military aspect of wars - the causes of conflict, an enumeration of battles, and a summary of the outcome(s); also the social and political context in which the wars occurred. In three comprehensive volumes and approximately 2,000 A-to-Z entries this encyclopedia covers major wars, rebellions, and revolutions from 3,500 BCE.
