Nina Thierer, Lisa Breitbard : Medical Terminology: Language for Health Care with Student CD-ROM and English Audio CD before purchasing it in order to gauge whether or not it would be worth my time, and all praised Medical Terminology: Language for Health Care with Student CD-ROM and English Audio CD:

2 of 2 people found the following review helpful. Recommended affordable version for online class By Panda man Got this older edition than the requested one for the Medical Terminology online class of the University of New England. The professor will give you the words via lecture, while you can write them all out, an actual view-able book is far more useful to me personally. Sometimes I read books or not, but I'm glad I bought this book for the course as it made things so much easier. Can't beat the overall price and the word list is pretty identical to the course. It is a little disease

terms heavy in the reading sections, so a previous course done in human anatomy and physiology would go a long long way in soaking this material up. 0 of 0 people found the following review helpful. Four Stars By YamilethNew 0 of 0 people found the following review helpful. Did you say that word has Greek roots or Latin? By Carolinakeeper Woohoo! I love medical terminology! It is hard, but interesting. You learn a lot about language. However, this is not a book I would read leisurely. This is definitely a class textbook to follow lecture in class.

Medical Terminology: Language for Health Care provides the comprehensive coverage needed for a 2-term or intensive 1-term Medical Terminology course. It provides clear instruction on the basics of anatomy and physiology, using a body systems approach, and making use of extensive new line art figures and photos. The text includes both clinical and administrative office examples and cases that provide a realistic context for introducing terms and definitions. The up-to-date coverage includes a new chapter on Alternative Medicine, and information on HIPAA guidelines. The student textbook comes with a free Student CD-ROM with interactive exercises and activities, and a 2-CD Audio Program for building pronunciation skills.

About the Author Nina Thierer (B.S., CMA, CPC), teaches in the Medical Assisting program at Ivy Tech Community College, Fort Wayne, IN.
