National Geographic Maps - Trails Illustrated : Mount Hood, Columbia River Gorge [Map Pack Bundle]
(National Geographic Trails Illustrated Map)

before purchasing it in order to gauge whether or not it would be worth my time, and all praised Mount Hood, Columbia River Gorge [Map Pack Bundle] (National Geographic Trails Illustrated Map):

0 of 0 people found the following review helpful. Would recommend for explorers of the outdoors
By Papa Bear
National Geographic maps are made of good quality materials and, give the user a good overview of the area to be explored. When used in conjunction with National Geographic's website for Printing USGS maps is a winning combination.
1 of 1 people found the following review helpful. Good maps, poor labeling on the bundle
By Paul B
The maps themselves are great - 5 stars for accuracy, clarity, and usefulness in my hiking trip. The labeling of this product gets about 2 stars - if you read the details, you can figure out which two individual maps are included in this package, but it's not obvious from the picture (map names are pretty small) and the map _numbers_ are not listed anywhere. For reference, this package includes Mount Hood (#820) and Columbia River Gorge (#821). Because of this lack of clarity in the labeling, I mistakenly believed that it included #819 instead of #821. My mistake, but a relatively easy one to make given what I noted above.

Waterproof Tear-Resistant Travel Map
The Mount Hood, Columbia River Gorge Map Pack Bundle is the perfect companion for anyone planning a trip the northern edge of the Cascade Mountains in Oregon. The two maps cover one of the most varied landscapes in the country, from the glaciers on the peak of the cone shaped Mount Hood to the turbulent waters of the Columbia River this combination of maps covers it all. The recreational opportunities available in this one small section of northern Oregon are astounding and each map is built to showcase the very different environments. Both maps includes trails, backcountry roads as well as numerous points of interest such as camping, wind surfing, and rock climbing areas.
Buy the Map Pack and save 15%!
The Mount Hood, Columbia River Gorge Map Pack includes:
Map 820 :: Mount Hood [Mount Hood and Willamette National Forests]
Map 821 :: Columbia River Gorge National Scenic Area
Every Trails Illustrated map is printed on "Backcountry Tough" waterproof, tear-resistant paper. A full UTM grid is printed on the map to aid with GPS navigation.
Map Scale = 1:75,000
Sheet Size = 37.75" x 25.5"
Folded Size = 4.25" x 9.25"

Late last year I wrote about a couple of very cool maps from National Geographic that covered all of Baja and offered everything you could possibly want from a map and then some. Now, they've got a couple of new offerings, with the same high quality, that cover Mount Hood and the Columbia River Gorge, two great adventure destinations. These maps fall under Nat Geo's Trails Illustrated series, and offer great topographical information, plenty of trail routes, campsites, roads, and plenty of other points of interest. They also come with plenty of useful navigational information, with Lat/Long coordinates, UTM grid, and more. They also have the Tread Lightly rules for both land and water travel printed right on the map, as well as the Leave No Trace philosophy too. And if that wasn't enough, there are also special safety notes and important phone numbers listed as well, putting all the information you could possibly need right at your fingertips. The maps are, as you would expect, of very high quality as well. They are both waterproof and tear resistant, which means they can stand up to punishment in the field, and you can toss them in your backpack without fear of them becoming damaged, and shredded by the end of your trip. They also happen to be printed in a very high resolution, making everything easy to read, including the sometimes very tiny topographical lines. Each of these two maps offer plenty of coverage of their respective areas too. For instance, the Mt. Hood map covers Badger Creek, Bull of the Woods, Mount Hood, and Salmon Huckleberry Wilderness Areas, as well as the newly legislated Clackamas Roaring River Wilderness Areas, amongst plenty of others. As if that wasn't enough, it also gives information on permits required to enter the wilderness areas or to climb the mountain itself. Likewise, the Columbia River Gorge map has Mark O. Hatfield Wilderness Area, White Salmon, Pacific Crest and Oregon Trails, Mount Hood, Columbia River Gorge, Historic Columbia River Highway, and Yakima Scenic Byways and more as well. It also lists scenic water falls within the region. As far as maps go, these are indispensable for hikers and climbers heading to these two regions to say the least. And if you're not heading to Mt. Hood or the Columbia River Gorge, then check out the other maps that National Geographic has available. There are plenty of other great destinations that they cover as well, and will have a similar level of information on those maps as well. --The Adventure Blog - 9/28/2009
About the Author
Founded in 1915 as the Cartographic Group, the first division of National Geographic, National Geographic Maps has been responsible for illustrating the world around us through the art and science of mapmaking. Today, National Geographic Maps continues this mission by creating the world's best wall maps, recreation maps, atlases, and globes which inspire people to care about and explore their world.
