The order was fulfilled by at their Kentucky address and whoever packages this needs to understand that they went way overboard on it. You get a very large 3 feet cylindrical cardboard tube mailer. Then once you take one of the ends off to take it out, you find the product is in ANOTHER cylindrical cardboard tube mailer! BUT BEWARE - it is so TOUGH you practically need a damn hacksaw to open it! I ended up damaging the top right corner of this wall chart just trying to pry it out with something and had to resort to cutting the mailer and still struggled to get the thing out for nearly half an hour without further damaging it. Take note in your Kentucky warehouse: YOU DON'T NEED TWO MAILERS FOR THIS PRODUCT. The product is already rolled nicely and sealed in plastic wrap. JUST PUT IT IN THE ONE LARGE EASY MAILER

AND LEAVE IT. 1 of 1 people found the following review helpful. Easy to see, quality image, very pleased!

The packaging was kind of funky, and it didn't want to stop rolling up. I put under my mattress for a couple days and it's great! The product smelled like smoke though. Was rather disappointed in the odor. Other than that, it's just what I needed!

My husband is finding this very useful but I think it would be great to have the posterior side with the muscles too. Ours was very, very easy to open as it came in the single canister. I used pliers to pull the lid off and it was so easy.

The Musculoskeletal System chart has front views of human musculature and skeleton. Additional views include the vertebral column and a cross-section of a generalized synovial joint. Heavy gauge 3ml lamination with sealed edges and two metal eyelets for hanging makes chart highly durable. Write-on/wipe-off with dry erase marker (not included).
